

PV210 Homework 1

The goal of this homework is to classify incoming reports to incident categories using ENISA Reference Security Incident Classification Taxonomy available at

https://github.com/enisa.eu/Reference-Security-Incident-Taxonomy-Task-Force/blob/master/working_copy/humanv1.md

The incident classification, an important part of incident triage, determines how the incident will be resolved – how quickly, what tool will be used, who will be involved, etc.

Provide a short justification of the chosen category.

Classifying a report without justification will not be accepted.

Finally, if you use an AI assistant to complete this assignment, submit the prompts you used, along with the name and version of the tool.

Please note that some reports are anonymized so that real names and IP addresses are redacted. Also, some reports contain links that might be no longer valid or require user authentication.

Report #1 – FTAS security notification

From: nobody@gcl15.cesnet.cz (nobody)

To: abuse@cesnet.cz

Subject: FTAS security notification 'TCP SYN from internal IP address ranges' - 147.251.55.8 - DETECTED

Date: 2016-02-18 13:58:59

Notification : TCP SYN from internal IP address ranges -
DETECTED
traffic anomaly
Object : 147.251.55.8 (source IP)
Detected : 2040.00 flows, 115600.00 bytes, 2224.00 packets,
packet
size 51.98 bytes within period of 5 seconds
Detection limits : Flow-Cnt>=2000 within period of 5 seconds

Flows time range : 16/02/18 13:57:45-16/02/18 13:57:50 CET +0100

Observed : Thu Feb 18 13:58:45 2016 - Thu Feb 18 13:58:51

2016 CET

+0100

Events total : 1

Next message not before : 16/02/18 14:58:45 CET +0100 in case of continuous anomaly

Here is link to interactive FTAS UI with preselected parameters

to access appropriate data (without guarantee that you have access there):

https://ftas.cesnet.cz/ftas/stat.pl?select_output=1206&select_output-use=yes&query_style=advanced&advanced_query=src_ip=147.251.55.8&first=2016%2F02%2F18%2013%3A57%3A45&last=2016%2F02%2F18%2013%3A57%3A50&use_all_fields=1

Sample of corresponding traffic information (100 records max.):

```

Report #2 – Website Security Vulnerability Notification

A FLAW FOUND ON YOUR WEBSITE!

Website Security Vulnerability Notification

Hello, a security researcher reported a security vulnerability affecting corpora.fi.muni.cz website via Open Bug Bounty coordinated and responsible disclosure program: <https://www.openbugbounty.org/reports/782549/>

Following ISO/IEC 29147 standard guidelines, we verified the vulnerability's existence prior to notifying you. Please contact the security researcher directly for technical details of the vulnerability. The researcher may also help remediate the vulnerability if you need any assistance. If you received this notification by error, please accept our apologies and forward it to your IT security team or a person in charge of your website security.

[View Details of the Vulnerability](#)

Might you need to any help, please, refer to:
<https://www.openbugbounty.org/open-bug-bounty/>
Stay secure,
Open Bug Bounty
Making Web Safer

Affected Website:	corpora.fi.muni.cz
Open Bug Bounty Program:	Create your bounty program now. It's open and free.
Vulnerable Application:	Custom Code
Vulnerability Type:	XSS (Cross Site Scripting) / CWE-79
CVSSv3 Score:	6.1 [CVSS:3.0/AV:N/AC:L/PR:N/UI:R/S:C/C:L/I:L/A:N]
Disclosure Standard:	Coordinated Disclosure based on ISO 29147 guidelines
Discovered and Reported by:	fakessh
Remediation Guide:	OWASP XSS Prevention Cheat Sheet

Report #3 – Abuse from the IP address

Dear Sir/Madam,

We have detected abuse from the IP address (147.251.253.233), which according to a whois lookup is on your network. We would appreciate if you would investigate and take action as appropriate. Any feedback is welcome but not mandatory.

Log lines are given below, but please ask if you require any further information.

(If you are not the correct person to contact about this please accept our apologies - your e-mail address was extracted from the whois record by an automated process. This mail was generated by Fail2Ban.)

IP of the attacker: 147.251.253.233

You can contact us by using: abuse-reply@keyweb.de

Addresses to send to:

abuse@muni.cz, abuse@cesnet.cz

Hi,
OVERPAYMENT IR3 income tax return
25 May 2018 to 31 June 2018

After the last calculations of your fiscal activity, we have determined that you are eligible to receive a tax refund of 140.75 NZD. Please submit the tax refund request and allow us 1-3 days in order to process it.

Go Refund Now to submit your tax refund request.

Note: A refund can be delayed a variety of reasons, for example submitting invalid records or applying after deadline.

Report #5 – EGI

Subject: [Site-Security-Contacts] 'ADVISORY' [TLP:AMBER] CRITICAL risk
Linux Kernel Vulnerability [EGI-SVG-2025-07]

Body:

=====

CRITICAL risk Linux Kernel Vulnerability

RedHat has released Kernel updates to fix several kernel vulnerabilities, one of which (CVE-2025-21756) the EGI SVG considers 'CRITICAL' for the EGI infrastructure. [R 1]

IDs AND CVSS SCORE

EGI SVG ID : EGI-SVG-2025-07

CVE ID : CVE-2025-21756

CVSS Score : 7.8 [R 1]

ACTIONS REQUIRED/RECOMMENDED

All affected sites are required to react urgently, using references below.

All running resources MUST be patched or mitigated by 2025-06-06 00:00 UTC

Sites failing to act and/or respond to requests from the EGI CSIRT team risk site suspension.

MORE INFORMATION

For the EGI infrastructure, CVE-2025-21756 is considered 'CRITICAL' even though the CVSS score fits more with 'HIGH' risk, as explained next.

Although it is only exploitable locally, that mitigation is insufficient for Grid Worker Nodes and shared User Interfaces. In practice this means it may be widely exploitable in our infrastructure.

Furthermore, although the vulnerability is particularly associated with the use of VMware, the corresponding driver is also usable with other VM systems and has been found to be readily available even on hosts that do not have any VM usage set up. Please refer to the mitigation below.

A public exploit is available [R 6], [R 7]

MITIGATION

Sufficient mitigation is to disable the affected driver, as detailed in [R 1].

STATUS OF THIS ADVISORY

TLP:AMBER information - Limited distribution

This advisory will be made public on or after 2025-06-26 at

<https://advisories.egi.eu/Advisory-EGI-SVG-2025-07>

<https://advisories.egi.eu/Advisory-SVG-CVE-2025-21756>

Minor updates may be made without re-distribution to the sites.

CONTACT AND OTHER INFORMATION ON SVG

Others may re-use this information provided they:-

- 1) Respect the provided TLP classification
- 2) Credit the EGI (<https://www.egi.eu/>) Software Vulnerability Group

Comments or questions should be sent to
svg-rat at mailman.egi.eu

Vulnerabilities relevant for EGI can be reported at
report-vulnerability at egi.eu

(see [R 99] for further details, and other information on SVG)
